

Easi-Grip® Long Reach Tools

For gardeners working from a seated position we offer four long reach tools, cultivator, fork, hoe and trowel, so that you can still reach ground level.

Alternatively you may find it comfortable to use these from a standing position.

Although these tools still have all the benefits of our ergonomic handle we recommend that they are used with our arm support cuff for optimum control and minimum strain on the wrist.

- 1 Long Reach Hoe | PLR-H
- 2 Long Reach Cultivator | PLR-C
- 3 Long Reach Trowel | PLR-T
- 4 Long Reach Fork | PLR-F
- 5 Arm Support Cuff | PGT-AS

Hand tools with longer handles are useful for light digging and cultivating the soil. They are particularly recommended if you garden sitting down or can't bend easily.

FEATURE	BENEFITS
Angled handle	Keeps the hand and wrist in a natural angle with prevents causing discomfort of the wrist
Non-slip grip	Tool does not require such a firm grip and is less likely to twist in wet or damp conditions
Extended shank	Allows a longer reach so wheelchair gardeners or those with bending difficulties can reach ground level
Stainless steel tool	Tool glides smoothly through soil even when wet and stops the tool becoming heavy with the weight of any adhered earth
Option to add arm support cuff	Versatility to allow tool to be used as it is or with extra assistance. Suitable for use in groups of gardeners with different needs or can be adapted if user's strength deteriorates

RECOMMENDED FOR

Difficulty Bending

Weak Grip

Poor Hand Control
